# PUMA 600/700/800 series

PUMA 600/700/800 series is a large horizontal turning center ideally designed for machining pipes and flanges used in oil and gas industry, hydraulic parts used in construction equipment, and also complex parts used in aircraft and ship building industry. Its maximum turning diameter and length are  $\text{\O}900\text{mm}$  and  $5050\text{mm}$ , respectively, which is the highest in its class. The slant bed design allows easy chip disposal.

### Single setup for machining large complex parts.

- Maximum productivity can be achieved with the 200mm ( $\pm 100$ mm) orthogonal Y axis structure, which allows users to machine variety of large and complex part.

### Boasting the largest machining area and top performance in its class, PUMA 600/700/800 series is perfect for machining large work pieces.

- With 5m maximum turning length,  $\varnothing 900$ mm maximum turning diameter, and 11,004N·m of Torque, machine is ideal for heavy-duty cutting of large parts used in different industries.

### Machining Solution for wide range of pipes.

- $\varnothing 375$  mm maximum spindle through hole diameter makes it ideal for turning large diameter pipes.
- Wide range of solution to improve threading performance and reduce failure ratio.

## Peripheral equipments

### Long boring bar option

The long boring bar option allows you to easily machine deep holes to minimize cycle time. Please consult with Doosan specialist for details.

### Twin chucking option

For more stable pipe threading process, twin chucking option (manual or pneumatic) is available. Please consult with Doosan specialist for details.

### Steady rest option

SINGLE

DOUBLE

TWIN

For turning a part with extensive length, various types of hydraulic steady rests (Single, Double or Twin type) are available.

### Chip conveyor (Right side) option

Hinged belt

Magnetic scraper

### Coolant tank

**Standard bed: 470L**  
**L: 570L (LY: 600L)**  
**XL: 770L**

Doosan's ergonomic roller coolant tank design, allows users to easily replace and refill coolant. Roller on the coolant tank allows users to simply take out and put it back in the machine like a drawer unit.

Chip conveyor type	Material	Description
Hinged belt	Steel	Hinged belt chip conveyor, which is most commonly used for steel work (for cleaning chips longer than 30mm), is available as an option.
Magnetic scraper	Cast Iron	Magnetic scraper type chip conveyor, which is ideal for die-casting work (for cleaning small chips), is available as an option.

## FANUC 32i

Fanuc CNC is tuned ideally to PUMA 600/700/800 series, in order to maximize productivity.

### User-friendly operation panel

The newly designed operation panel groups all of the common buttons together to enhance operator's convenience. Also, 'QWERTY' keypad is applied as standard to improve convenience of users who are accustomed to PC keyboards.

### Easy Operation Package

Increase Productivity

Reduced non-cutting time by **10%**

Minimizes non-cutting time to further improve productivity.

#### Operation rate

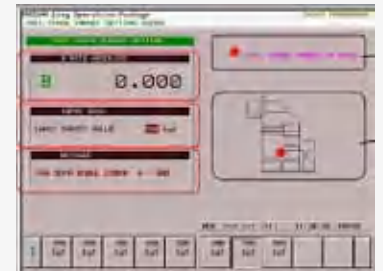

Function allows users to easily keep track of machine operating hours and the number of completed parts.

#### Tool load monitoring option

This function detects overload on tools, caused by wear and damage, and triggers an alarm to minimize damage.

#### Tail stock thrust force setting option

This function allows users to easily setup tailstock thrust force on the screen.

## Stable threading performance

All PUMA 600/700/800 series (2-Axis\* to Y-Axis) are capable of threading work.

\*In order to re-machine threads or perform arbitrary speed threading on a 2-Axis machine, additional optional devices have to be selected.

## Threading repair function

This function allows users to repair thread even when original program is not available and this is a standard Fanuc NC function.

## Re-machining function option

This function allows users to re-machine damaged threads by using the existing program.

## Arbitrary speed threading option

This function allows users to control spindle speed in order to set it at an ideal machining condition to keep the best thread quality.

## Doosan Machine Tools' Global Network, Responding to Customer's Needs nearby, Anytime, Anywhere

Doosan machine tools provides a system-based professional support service before and after the machine tool sale by responding quickly and efficiently to customers' demands.

By supplying spare parts, product training, field service and technical support, we can provide top class support to our customers around the world.

### Domestic Service Support Network

Integrated Support Centers	2	Sales Branch Offices	7	Post-Sales Service Centers	6	Designated Repair Service Centers	31
----------------------------	---	----------------------	---	----------------------------	---	-----------------------------------	----

## Customer Support Service

We help customers to achieve success by providing a variety of professional services from pre-sales consultancy to post-sales support.

### Supplying Parts

- Supplying a wide range of original Doosan spare parts
- Parts repair service

### Field Services

- On site service
- Machine installation and testing
- Scheduled preventive maintenance
- Machine repair

### Technical Support

- Supports machining methods and technology
- Responds to technical queries
- Provides technical consultancy

### Training

- Programming / machine setup and operation
- Electrical and mechanical maintenance
- Applications engineering
